

```
namespace paql
{
    namespace element
    {
        struct Element
        {
            type1 var1; ... typeN varN;
            bool operator==(const Element& other) const
            {
                return (other.var1 == var1) && ... && (true);
            }
        };
    }
}
```
